Experience

LLC IDEA / Lead System Administrator

03.2020

Installation, configuration and support of IT infrastructure:

- Orchestration of containerized applications (setup, support and use): Yandex Managed Service for Kubernetes, Docker;

- DevOps Lifecycle System (Usage and Support): Gitlab;

- Configuration management system: Ansible, Terraform;

- Virtualization (support): VMWare, vCloud Director;

- Virtual machines with operating systems (installation and support): Ubuntu Server, Centos, Arch Linux, MS Windows Server;

- Monitoring system (installation and support): Zabbix;

- Postal system (installation and support): Zimbra Open Source;

- Knowledge base platform (installation and support): Confluence;

- DevOps life cycle system (use and support): Gitlab;

- Platform for telephony (support): FreeSWITCH;

- Stack for online store (installation and support): haproxy, nginx-reverse proxy, nginx, php, php-fpm, postgresql, bitrix;

- Stack for organizing employees' workplaces (installation and support): Active Directory, DNS, DHCP, RDS-Gateway, RDS-Broker, RDS-Host, Print Server;

- Stack for 1C operation (installation and support): Windows 2022 Enterprise, MSSQL Server, 1C Application Server;

- Backup system (installation and support): Veeam Backup & Replication;

- Stack for networking (configuration and support): Mikrotik, Router OS, OSPF, L2VPN, Ubiquity switch, Extreme switch, Unifi Controller, Omada Controller.

LLC Akira Oil / Lead System Administrator

08.2017 - 02.2020

Installation, configuration and support of IT infrastructure:

- Virtualization stack (assembly, installation and support): Vmware ESXi hypervisor, Supermicro servers, Infortrend storage system, 10Gbit DAC connection (Mellanox DAC adapters), vCenter;

- Stack for networking (installation and support): Mikrotik RB2011, GRE Over IPSEC + OSPF, SNR SNR-S2985G Switch;

- Monitoring system (installation and support): Zabbix;

- Email platform (installation and support): Zimbra Open Source Email;

- Cloud storage platform (installation and support): Nextcloud;

- Stack for working with 1C (installation and support): Ubuntu Server with PostgreSQL, Windows Server 2012 with the "Remote Desktops" role and 1C;

- Platform for telephony (installation and support): Asterisk, FreePBX;

- Backup stack (scripting and support): Ubuntu Server, Bash, Rsync, SSH, FTP;

- Centralized management system for users, groups and hosts (installation and support): FreeIPA;

- Service for converting DNS to IP and vice versa (installation and support): Bind9;

- Instant messaging stack (installation and support): Openfire, Pidgin;

- Stack of centralized anti-virus protection (installation and support): Ubuntu Server, ERA Nod32, ESET Nod32;

- Networking stack (installation and support): Mikrotik RB2011, GRE Over IPSEC+OSPF, SNR SNR-S2985G Switch;

- Wireless networking stack (installation and support): Ubuntu Server, Unifi Controller, Unifi Access Point.

JSC Primorsky agency of aviation companies Biletur / Lead System Administrator

10.2008 - 08.2015

Installation, configuration and support of IT infrastructure:

- Virtualization (assembly, installation and support): Proxmox hypervisor, Dell servers, IBM DS3512 storage system, FC connection;

- Servers and virtual machines with operating systems (assembly, installation and support): MS Windows 2003-2012 Server, Ubuntu Server, FreeBSD;

- Stack for organizing employees' workplaces (installation and support): Active Directory, DNS, DHCP;

- User traffic control stack (installation and support): FreeBSD, SQUID, SAMS;

- E-mail platform (installation and support): Lotus;

- Stack of collecting information from workstations and servers (installation and support): Ubuntu Server, OCS Inventory server, OCS Inventory agent;

- Stack of centralized anti-virus protection (installation and support): Ubuntu Server, ERA Nod32, ESET Nod32;

- Networking stack (installation and support): Zyxel Zywall routers, PfSense software router, IPSec for branch consolidation, Open VPN for connecting users;

- File storage stack (installation and support): Dell Server, Raid5, Ubuntu Server, Samba;

- Service for centralized management and storage of Microsoft updates (installation and support): WSUS.

Modern Humanitarian Academy / System Administrator

10.2007 - 09.2008

Installation, configuration and support of IT infrastructure:

- Servers and workstations with operating systems (assembly, installation and support): MS Windows XP Professional, MS Windows Server 2003;
- Stack for organizing employees' workplaces (installation and support): Active Directory, DNS, DHCP;
- Traffic control stack (installation and support): MS Windows 2003, Kerio Winroute Firewall.

Education

Yandex Educational Technologies / Devops for Operations and Development

03.2023 - 12.2023

Modern Humanities Academy / Bachelor, Informatics and Computer Engineering, Automated Information Processing and Control Systems

09.2007 - 06.2010
